

Student Performance and learning outcomes

Digboi Mahila Mahavidyalaya, is an institution which provides the students to acquaint themselves with various disciplines of humanities, which are-

- Since the disciplines aim to understand various social processes and take the society as the base of development, the students are believed to have understood various social processes and its effects.
- The program also triggers the students to think about various issues in a critical manner. Thus students develop a critical approach to develop various perspectives of the social issues.
- Most of the program targets the students to understand both empirical and normative aspect of a discipline. The students then develop a sense of how to relate theory with real life practices.
- The programs also deal with the study of biographical text of various famous personalities. This kind of interpretation is not only beneficial for students to understand the context but also proves inspiring for the students to undertake any research activities.
- The programs also demand tours and excursion as a part of their syllabus. The excursion makes the students not only understand the events and places, cultures and philosophy; but also makes them quite conscious about the world. These excursions also help them to work in teams and be self-sufficient.

Program Specific Outcomes

Along with the regular syllabus the college has added some specific courses in their curriculum. These courses, though part of the wide program, but they are generalized in a way which have specific outcome for the students. For eg;

- The college has a specific course “baking”. These enable students to understand and learn the technique of the art of baking. Baking is essentially a skill, which in the long run also enables students of pursuing
- Tourism as a course is undertaken by the Department of History. Tourism as a sector is a commercial one, thus helping the students to learn the dynamics of it; benefits them later, to even pursue a career in it. The course targets the student to understand the complexities of the tourism sector which helps them to develop management skill.
- Communicative English is another example which is undertaken by Department of English. This course helps the student coming from various backgrounds to be able to communicate in the universal language. For every job and every governmental work; domestic or international, one need to communicate in English. Thus, this course helps the students in doing so.

- Environmental Education/ Studies is another example shared by many departments itself shows the multi-disciplinary nature. EVS makes the students understand the various issues and protocols related to protecting the environment. This help in being aware of the various issues related to the environment and what one can do to protect it. It also helps the students to being a conscious and helpful citizen.
- Department of Education undertakes a skill-based course-teaching at the elementary level. This course makes the students understand child psychology and the various ways to deal with the problems of the students at the elementary level. It also helps the students understand various ways to deal with students' learning process and behavior. Also as a part of their syllabus, the college facilitates the students' to go to various schools and practice their skills.

Course outcome: Digboi Mahila Mahavidyalaya has 11 departments out of which 9 subjects have Major.

- a. Effective Communication: The four departments viz. English, Assamese, Bengali and Hindi have the language component, apart from literature. Through the courses on language and literature, students acquire the abilities of writing and speaking fluent and grammatically correct language. Students are also enabled to acquire proficiency in the finer nuances and dynamics related to language.
- b. Critical thinking: Rather than spoon feed with notes and other allied materials, which are easily available on the net these days, the students of the college are dissuaded from rote learning and taught to concentrate on internalizing their lessons well.
- c. Social Interaction: At times, group tasks are given to the students both in their studies as well as other co-curricular activities. These kinds of activities are very useful, tried and tested formula to enable students to elicit views and opinions of other people.
- d. Effective Citizenship: The College has an NSS Wing which provides the students opportunities to undertake a lot of socio-cultural activities.
- e. Ethics: Once in a while, the college organizes talks on ethics and morality by inviting eminent personalities from different places.
- f. Environment and Sustainability: The students of the college are made aware of the environment and environmental hazards that the world faces today. Once they start taking care of their college and realize the importance of cleanliness, they start to evolve as responsible citizens aware of environmental issues and sustainable development.
